**Subject:** DTA Dumper Replacement

As of today, our dumper has returned to normal enclosed status.

A point of note is that we have been operating on a very limited basis between July 11-22, though our scheduled return to work time was July 10. This is due to a series of significant mechanical problems. July 23 was the return to full, uninterrupted operation. Most, but not all, of the roof re-install was complete at this time.
